

Module 1 Graded Assessment

LATEST SUBMISSION GRADE

100%

1. What is a computer program?

- ☐ A file that gets printed by the Python interpreter.
- ☐ The syntax and semantics of Python.
- ☐ The overview of what the computer will have to do to solve some automation problem.
- ☒ A step-by-step recipe of what needs to be done to complete a task, that gets executed by the computer.

1 / 1 point

Correct

Right on! Being able to write such programs is a super useful skill that you'll acquire through this course.
